

# PARADISE

## Virgin Hotels Opens in Las Vegas

Another Los Angeles-based design firm, **Avenue Interior Design** took Yenbamroong's dream of combining a Thai countryside eatery with a French disco brasserie by adding design elements from electric orange wall paint, custom oilcloth-inspired patterns for the tabletops and a disco ball installation.

According to Avenue Interior Design, Principal, Ashley Manhan Justman, "One of the biggest draws for visitors to Las Vegas is the restaurant scene and everyone is in search of the newest edition to the mix. From a guest perspective, the food must be outstanding, the design original and the experience memorable to say the least. They already came to the table with a strong identity and we are upping the ante with a few additional dramatic, party-centric additions to the design of the interior."
